

# ALEKSANDR OCHIROV

## QA AUTOMATION ENGINEER

New York Metropolitan Area, US — Open to relocation

Authorized to work in the U.S. – no visa sponsorship required

☎ 203-539-1063 ✉ [aochirov.tech@gmail.com](mailto:aochirov.tech@gmail.com) 🔗 [linkedin.com/in/aleksandr-ochirov](https://linkedin.com/in/aleksandr-ochirov) 🐙 [github.com/OchirovAleks](https://github.com/OchirovAleks)

### Summary

QA Automation Engineer with hands-on experience testing web applications, REST APIs, and CRM/ERP-style workflows using JavaScript, TypeScript, Cypress, Playwright, Jest, Supertest, Postman, and GitHub Actions.

Experienced in automated UI testing, API testing, defect reporting, GitHub pull requests, CI workflows, Jira, Confluence, Slack, and daily standups. Also built and deployed a full-stack Node.js/React/PostgreSQL application with JWT authentication, API integration tests, Playwright E2E tests, and CI/CD.

### Skills

**Testing:** API Testing, End-to-End Testing, Integration Testing, Regression Testing, Manual Testing

**Automation:** Playwright, Cypress, Jest, Page Object Model

**API:** REST APIs, Postman, Supertest

**Languages:** JavaScript, TypeScript, HTML/CSS, SQL

**Tools:** Git, GitHub, GitHub Actions, Jira, Confluence, Slack, CI/CD, YAML

**Development:** Node.js, Express, React, PostgreSQL, Prisma

### Experience

#### QA Automation Engineer

January 2024 – Present

*Kompot AI / PASV*

*Remote*

- Developed and maintained end-to-end UI test automation using **Cypress** and **Playwright** for an actively developed CRM/ERP platform.
- Wrote automated test cases in **JavaScript** and **TypeScript** for new and existing product workflows.
- Used **Page Object Model** to organize reusable UI test logic and improve test maintainability.
- Built API test coverage using **Jest**, **Supertest**, and **Postman** for REST endpoints.
- Worked with REST API methods including **GET**, **POST**, **PUT/PATCH**, and **DELETE** during API testing.
- Created GitHub branches and submitted pull requests reviewed and approved by an experienced engineer.
- Configured and updated **GitHub Actions** YAML workflows to run automated tests in CI.
- Collaborated with developers and QA engineers through **Jira**, **Confluence**, **Slack**, and daily Zoom standups.
- Investigated failed test runs, reproduced issues, documented defects, and verified fixes during development cycles.

### Projects

#### Task Manager – Full-Stack Application

2026

GitHub: [github.com/OchirovAleks/task-manager](https://github.com/OchirovAleks/task-manager) — Live: [task-manager-gamma-five-66.vercel.app](https://task-manager-gamma-five-66.vercel.app)

- Built and deployed a full-stack task management application using **React**, **Node.js**, **Express**, **PostgreSQL**, and **Prisma**.
- Implemented **JWT authentication** and user-scoped project/task data access.
- Developed REST APIs with CRUD functionality for projects and tasks.
- Wrote API integration tests using **Jest** and **Supertest** to validate API behavior and database interactions.
- Created end-to-end tests using **Playwright** to validate core user workflows.
- Configured **GitHub Actions** CI to run backend tests and frontend build checks.
- Deployed frontend to **Vercel** and backend/database to **Render**.
- Designed modular backend architecture with dependency injection and centralized error handling.

### Education

#### PASV Bootcamp

2024

*QA Automation Training*

#### Irkutsk State Medical University

2015 - 2021

*Doctor of Medicine*
